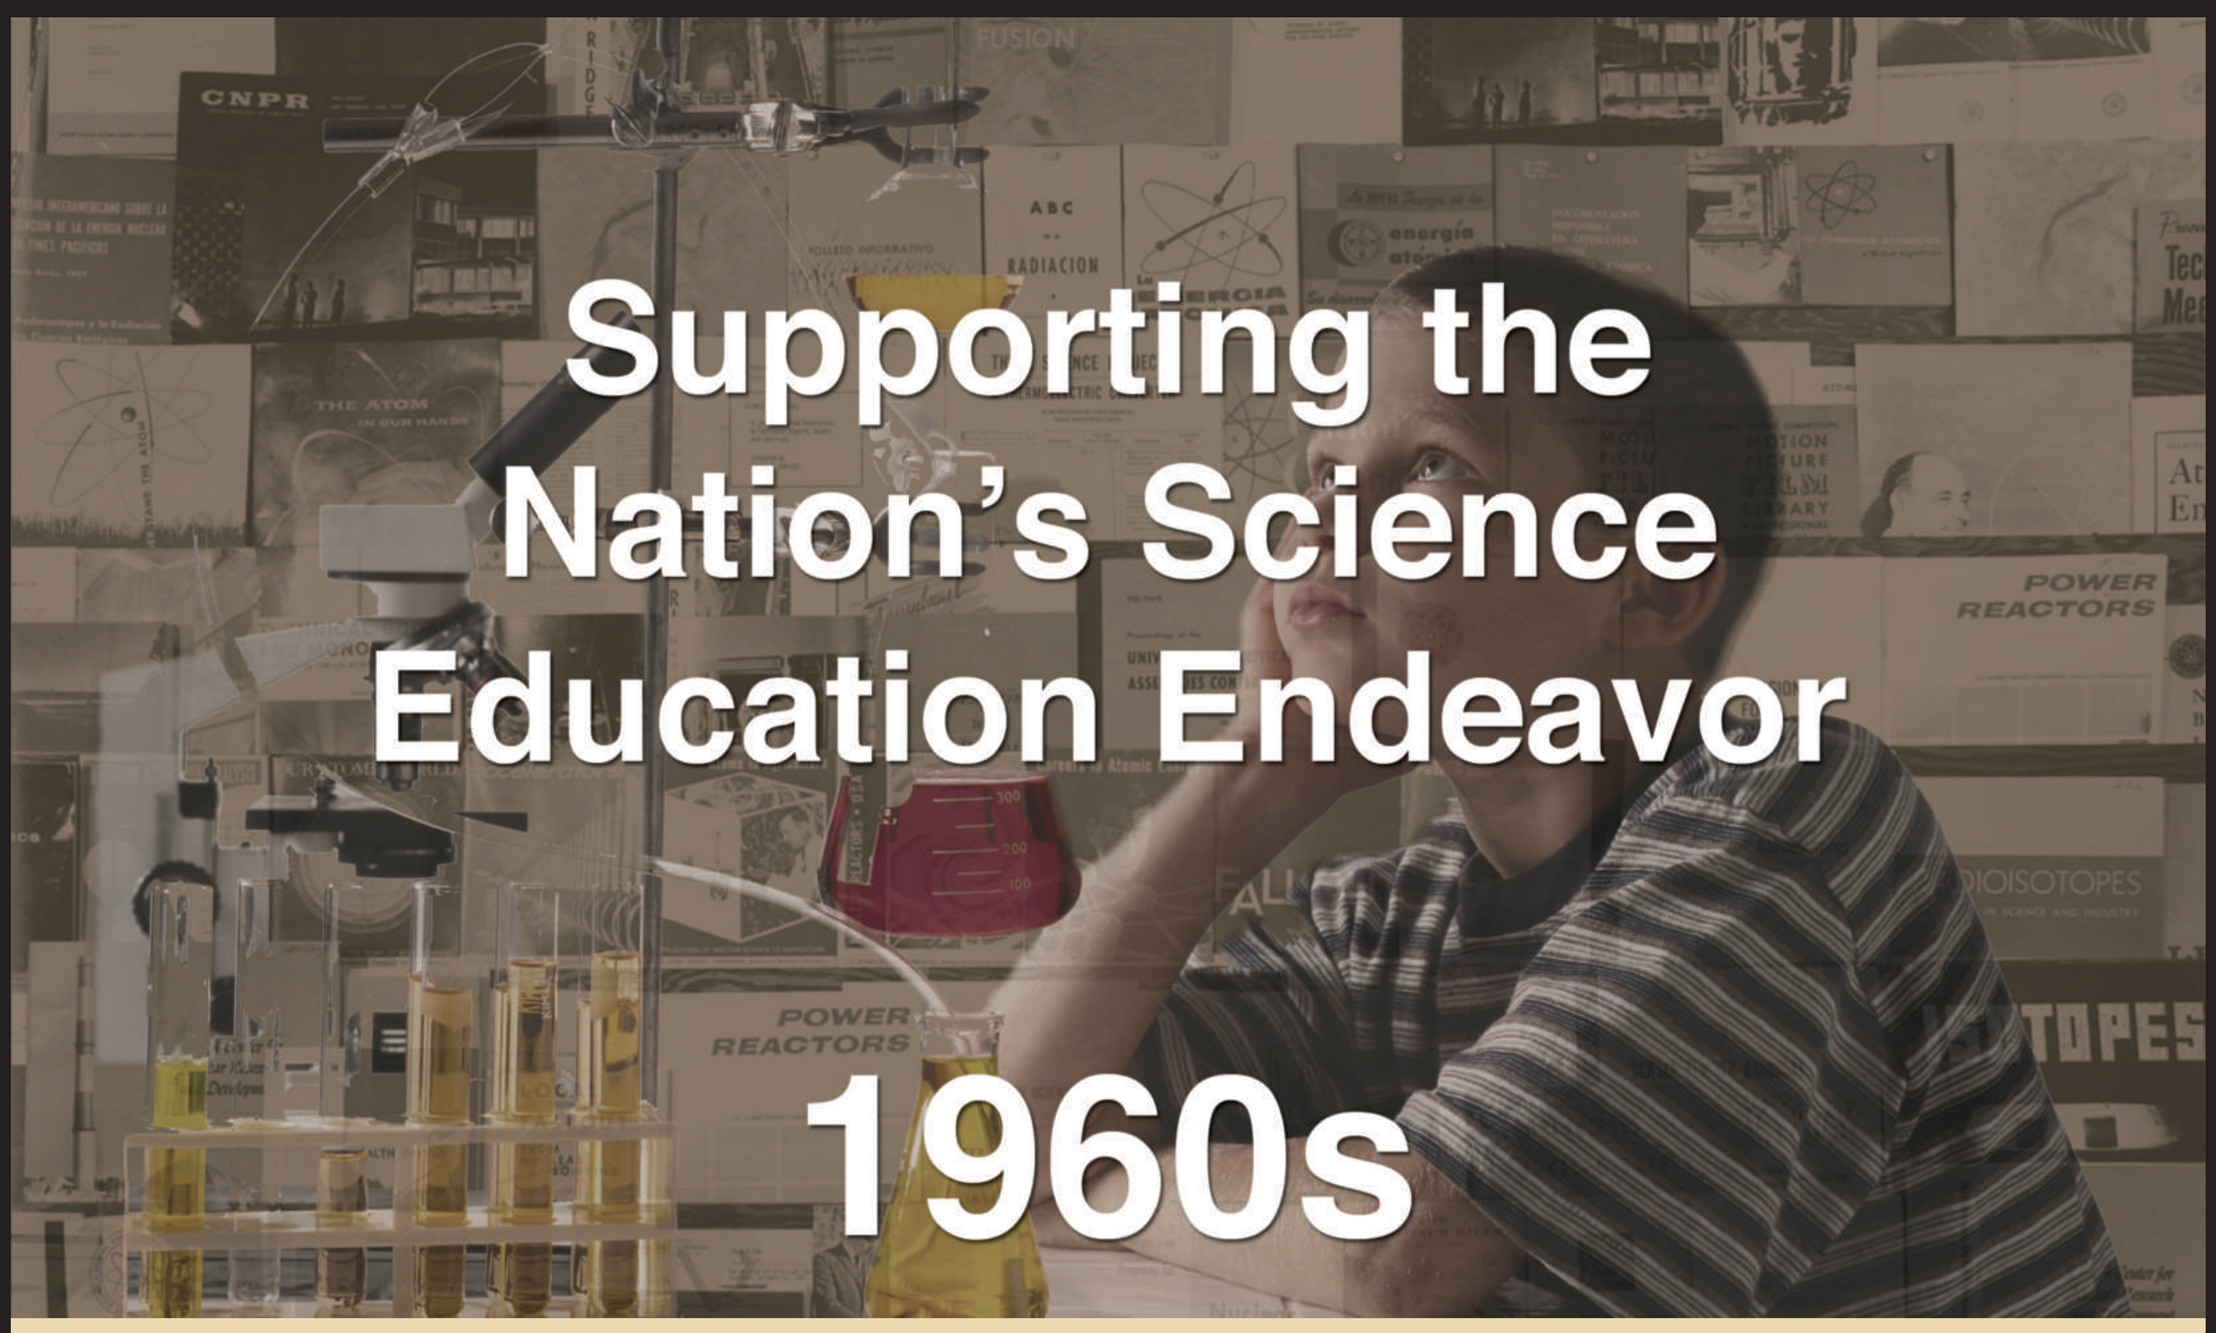
# Office of Scientific and Technical Information



**1962** Technical Information Division becomes the Division of Technical Information Extension (DTIE); DTIE maintained Atoms for Peace libraries, first booklets in the series "Understanding the Atom"

**1963** Weinberg Report issued by the White House, documented the value of technical information and identified the transfer of information as an inseparable part of R&D; DTIE supported foreign exhibits program; production of microfiche began

**1964** Provided scientific materials for the Third Geneva Conference and distributed half-million booklets to the New York World's Fair

**1967** Computer processing of information began, electronic information was stored to enable rapid searching of bibliographic information

**1969** DTIE was instrumental in establishing the International Nuclear Information System created under the International Atomic Energy Agency; work began on instructional series for elementary school science, "The World of the Atom"
