CHR RECORDS

Diet since entrance to metabolism.

Protein 123 gm
Fat 51 gm
Carbohydrate 281 gm.
Calories (/...) 2100

Urine collections began on 11/14/45
Fecal collections began on 11/15/45
Medicine was sent during the 24 hour period 11/16/45 - 8 A.M. to 11/17/45 - 8 A.M. The experimental period began on 11/27/45 at 11:02 A.M. This patient has been very cooperative and at present seems to be in fairly good health.

HPS 3. #202444, age 56.

Diagnosis - Amyotrophic Lateral Sclerosis
Psychosis, Depressive

Ability to eat and sphincter control are adequate at present.

Hb. 16.3 gm/100 ml. whole blood
Urea clearance 80% of normal.

Collections of urine were begun on 11/21/45 at 8 A.M.
Fecal collections began 11/23/45 - 8 A.M.
Experimental period began 11/30/45 at 11:56 A.M.

As medication he has been receiving choline chloride. This has resulted in loose stools but these can be regulated by reducing the dose of choline.

So far he has cooperated quite well but has a difficult p... ity. The prognosis is poor and a fatal termination can be expected within a year. His diet contains:

Protein 71 gm.
Fat 134 gm
Carbohydrate 276 gm.
Calories 2450

It begins to look now as if we might be without patients at Christmas. No one seems to want to be in the hospital on that particular day. I will do what I can, however, to keep the production line going.

Sincerely yours

SHB:dgh

Samuel H. Bassett
