SEC SECTION	C63
ABSTRACT	CURRENT UTILIZATION OF THE LINEAR ACCELERATOR AS WELL AS 5-YEAR CUMULATIVE EXPERIENCE IN RADIOTHERAPY IS PRESENTED. CUTANEOUS LYMPHOMAS AND MAMMARY GLAND CARCINOMAS WERE THE PRIME EXPERIENCE REGION; HOWEVER, CANCERS AT OTHER LOCATIONS WERE TREATED WITH MIXED-BEAM THERAPY; EMPLOYING FAST NEUTRONS AND PHOTON BEAMS. THE TECHNIQUE APPEARS PROMISING FOR ABDOMINAL TUMORS AND DEEP-SEATED MALIGNANCIES. CARCINOMA OF THE PANCREAS RESPONDS FAVORABLY TO THIS TECHNIQUE. (PCS)
