Acknowledgments

The authors wish to thank Mr. Steve Jones of Eveready Battery Co. for providing several of the TiS_2 cathodes and for the long cycling of a Li-TiS_2 cell with the Lipon electrolyte. We also thank Dr. F. Shokoohi of Belcore for supplying a thin-film of $LiMn_2O_4$ that we used in fabricating the Li-$Li_xMn_2O_4$ battery. This research was sponsored by the U.S. Department of Energy Division of Materials Sciences, Office of Transportation Technologies, Division of Chemical Sciences, and Office of Energy Research Technology Transfer Program under contract DE-AC05-84OR21400 with Martin Marietta Energy Systems, Inc.
