RW Field Tests

CMLNR-SP 4-04-13-01 12 April 1950

SUBJECT: Aircraft Requirement for Field Testing RW Munitions

TO: Chief of Staff
United States Air Force
Washington 25, D.C.
ATTN: AFMAD-4

1. Confirming discussions between Major W.W. Stone, this office, and Captain C.I. Browne, Directorate of Armaments, Headquarters, United States Air Force, current RW field test plans of the Chemical Corps are to conduct a series of air drops during the late summer of 1950 at Dugway Proving Ground, Utah, as follows:

First drop	3 August 1950	Bomb E59R1
Second drop	5 August 1950	Bomb E59R2
Third drop	5 September 1950	Bomb E59R3
Fourth drop	8 September 1950	Bomb E59R4

2. To permit the conduct of the above tests, it is requested that the United States Air Force provide the services of a B-50 or a B-29 aircraft. Special bomb bay equipment will be required to accommodate the E59 type RW munition. The ancillary equipment should be similar to that used for similar drops last summer from a Special Weapons Command B-29 aircraft.

3. It is further requested that the Chemical Corps be informed as soon as possible if the presently scheduled dates for the munitions tests are acceptable.

FOR THE CHIEF, CHEMICAL CORPS:
