AIR1.961126.014C

FROM: Research Committee/Col Conrad

SUBJECT: Minutes of Committee Meeting

TO: SGS
SN
IN TURN

1. The Research Committee members met in the T-7 Conference Room, Wilford Hall USAF Medical Center, on 24 November 1970 at 1400 hours.

2. The following Committee Members were present:

Col Conrad-Chairman	Lt. Col Armstrong
Lt Col Bradley	Col Kemmerer
Lt Col McPhaul	Lt Col Coltman

3. There was no old business.

4. New Business The following proposals were presented.

a. "Enzyme Diagnosis of Myocardial Infarction after Heart Surgery". Principal Investigator-Major James Wild. This study was approved tentatively pending receipt of a letter from the Clinical Laboratory stating that they will be able to support the laboratory studies required by this investigation; specifically that the laboratory will be able to do Isoenzymes of LDH.

b. "Measurement of Nutrient Coronary Blood Flow". Principal Investigator Major Stanley Wishner. This investigation was disapproved. It is felt that the experimental technique involved in this protocol should be undertaken in animals prior to its acceptance into the Cardiac Catheterization Laboratory to be used on humans. An experimental protocol using dogs will be submitted.

c. "The Evaluation of the Electrophysiological and Hemodynamic characteristics of Patients with Acquired right and left Bundle Branch Block" Principal Investigator Major Barry Ramo. This study was approved without reservation.

5. There being no further business the meeting was adjourned at 1400 hours.

Fred G. Conrad
