Dr. John L. Tullis
Overlook Hospital
Summit, New Jersey

Dear John:

The draft report of the Ad Hoc Group on Radiobiology was received here on about the 20th of August. I reviewed the thing on September 4 and forwarded my review to Chuck Dunham since I was on a rather extensive trip to the Midwest. I had thought he would consolidate my comments along with those of Bruner and return them to you; however, when I returned on September 21 I discovered that they were still here. A copy of these comments are attached for your information. I certainly don't want to make an issue concerning my suggestions but do feel that they should be considered before we send in a final draft. You may take these suggestions for what they seem worth. I hope this has not come to you too late to be of value in preparing a final draft.

In order that you may make complete sense out of the comments, I am returning a copy of the draft to you. The attached comments are copied directly as I wrote them in long hand in the form of a note to Chuck Dunham.

If I can be of additional assistance, please let me know.

Sincerely yours,

James L. Liverman
Assistant Chief, Biology Branch
Division of Biology and Medicine
