After discussion of the attached proposals from Battelle with Jim Taub, we suggest that you take the following steps:

1. Arrange to get program B into effect immediately with the following changes:

(a). Joining beryllium to beryllium is to be included as highest priority in the joining program.

(b). Joining beryllium to magnesium can be dropped.

2. Procure from Brush Beryllium Company the beryllium sheet required by Battelle for program B and supply it to Battelle.

3. Hold action on program A until Marshall Holloway requests it to be put into effect with specifications upon the discs or other shapes in in accordance with more realistic requirements for project Panda. Incidentally, in the meantime, Taub will investigate with Brush the possibility of making sheet in a 50" rolling mill which may be available for this work.

Mr. Taub would appreciate having these Battelle proposals or copies thereof when available.
