AEC RESEARCH AND DEVELOPMENT REPORT

~~CONFIDENTIAL~~

~~SECRET~~

Table of Contents (cont.)

	Page
E. Physics Group VI - John Marshall	16
1. Comparison of Control Rod Shapes	
2. Cross Section of G18	
F. Exponential Experiments in the West Stands - P. Morrison	18
1. "W" Lattice	
2. Program	
G. Cyclotron Group - A. H. Snell	19
1. General	
2. Beta-Ray Spectrometers	
3. Thorium Fission Products	
4. Slow Neutron Capture Cross Section of Argon ⁴⁰	
H. Nuclear Physics - Experimental - B. T. Feld	20
I. Theoretical Section - E. P. Wigner	21
1. Summary	
2. Continuous β^- -ray Spectrum in α -Decay	
3. Rigorous Treatment of the Slowing Down of Neutrons	
J. General Lattice Design Group - A. M. Weinberg	24
1. Lattice Calculations	
2. Efficiency of a Control Rod Which Absorbs Only the Thermal Neutrons	
3. Migration Length	
K. Heavy Water Group - G. Young	28
1. Radiation Hazard from Proposed P-9 Pile at "X"	

~~RESTRICTED DATA~~

This document contains information restricted under the Atomic Energy Act of 1954, as defined or the espionage Act of 1917. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited.

This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, U.S.C. 50: 31 and 32. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.
