Subject: Extension without funds of USPHS Grant # C - 2496

The above noted grant for $3,296.00 was activated for the period from 12/1/54 to 11/30/55. It is requested that this period be extended without further funds to 5/31/56.

The extension is requested because further pilot work has revealed the necessity for extensive revisions of these aspects of the experimental design related to the production of psychological stress. Although these revisions have now been made and tested experimentally, further delay is anticipated in the ordering of parts for, and construction of revised stressing equipment and cages for full scale experimental runs.

Under these circumstances it will not be possible for us to complete the program of experimental work planned for the initial grant period, before 11/30/55. Therefore, extension without funds to 5/31/56 is requested with renewal of support to commence on 6/1/56.
