Date 11-9-90

Subject: Review of Medical Status of Pfc. [redacted] (M.I.T.) (U)

MEMORANDUM to Lieut. R. B. Hyde, Madison Square Area, New York.

1. A review of the health status of [redacted] of the S.E.D. group at Massachusetts Institute of Technology was made on 26 January 1945. On the same visit, the examinations and x-rays of all S.E.D. members were reviewed with Dr. Aub of the Harvard Medical School and Dr. Sibley of the dispensary at M.I.T.

2. In the opinion of Dr. Aub and the undersigned, the physical abnormality found in [redacted] can best be explained by early beryllium exposure.

3. To improve the morale of the entire S.E.D. group, it was decided to transfer [redacted] to an unexposed technical job at M.I.T. rather than to send him to another part of the District. Evidence of poor morale caused by the appearance of a questionable hazard in a co-worker (Smith) was in evidence at the time of this visit.

4. It is advised that [redacted] be retained as a member of the Special Engineering Corps and be transferred to the enlisted reserve as soon as his physical condition is again normal.

[illegible]
1st Lieut., Medical Corps.

cc: Lt. W. W. Lord
