Dr. W. F. Bale
The University of Rochester
School of Medicine
Rochester 3, New York

Dear Dr. Bale:

The Armed Forces Special Weapons Project has been requested by the Military Liaison Committee to sponsor a Study Group to review the technical changes and progress in the field of radiological warfare. Dr. W. A. Noyes, Jr., has consented to serve as chairman of this group. The technical information generated by this study will be of value to future Weapons Systems Evaluation Group studies of the military worth of RW and of value to orient properly the current Department of Defense and Atomic Energy Commission research and development effort in this field.

I would be particularly pleased if you will serve as a member of this group. Your advice is needed concerning the current status of the biological effects of whole-body irradiation on man.

Should you find that you are able to participate, members of my staff will contact you concerning the details of the composition and method of operation of the group.

Sincerely,

[illegible]
Brigadier General, USA
Chief, AFSWP

M/R: Self-explanatory.
