Dear Dr. Riebel:

Thank you very much indeed for your letter and the enclosed information. This summarization of opinion is interesting, and the Advisory Committee for Biology and Medicine is almost continually considering information bearing on the advisability of continuing present standards or alteration from it. I am sure that these excerpts will be of interest to them.

I believe that the best group for consideration of this problem is the Committee on Radiation Protection under sponsorship of the National Bureau of Standards which is made up of representatives, as you know, of radiological societies and other groups interested in these problems.

Sincerely yours,

Shields Warren, M. D.
Director, Division of
Biology and Medicine
