

#### ACKNOWLEDGMENTS

It is a pleasure to acknowledge the special help in the bombardment of the curium samples of Professor J. G. Hamilton, G. B. Rossi, T. M. Putnam, Jr., M. T. Webb, and the operating crew of the 60-inch cyclotron in the Crocker Laboratory. The successful handling in a safe manner of the radioactivity involved was made possible through the use of the excellent protective equipment provided by Nelson Garden, the members of his Health Chemistry Group, and C. M. Gordon. We wish also to thank E. K. Hulet and G. H. Higgins for their assistance in the experiments. We are happy to acknowledge the continued support and interest of Professor E. O. Lawrence in this work.

This work was performed under the auspices of the AEC.
