

^aBased on constant 1992 dollars.

Fig. 8.1 Cumulative Sales of ERIp Inventions and Spinoff Technologies^a

Finally, this evaluation assessed the energy and environmental benefits associated with ERIp technologies. It documents that more than \$531 million of energy expenditures has been saved over the past decade as a result of the commercial success of three ERIp projects. These energy savings have resulted in reduced emissions of nearly one million metric tons of carbon.
