October 2001

This work was supported by the Assistant Secretary for Energy Efficiency and Renewable Energy, Office of Building Technology, State and Community Programs, Office of Building Research and Standards of the US Department of Energy under Contract No. DE-AC03-76SF00098. This research used resources of the National Energy Research Scientific Computing Center, which is supported by the Office of Science of the U.S. Department of Energy. Work at NERSC was supported by the Director, Office of Science, Division of Mathematical, Information, and Computational Science of the U.S. Department of Energy under Contract number DE-AC03-76SF00098.
