

U.S. ENVIRONMENTAL PROTECTION AGENCY HIGHWAY AND NON-ROAD DIESEL STANDARDS UPDATE

William Charmley

U.S. Environmental Protection Agency

ABSTRACT

This presentation will provide an overview of the U.S. Environmental Protection Agency (EPA) highway heavy-duty diesel 2007 program and an update on recent progress, including both light-duty and heavy-duty vehicles. The presentation will also discuss EPA's recent proposal for a new standards

that would dramatically reduce the fuel sulfur levels in off-highway diesel fuel and at the same time require dramatic reductions in particulate matter and oxides of nitrogen from non-road diesel engines used in farm, construction, and industrial equipment.
