**LIMITATION CODE** -COPY                   **AUDIENCE CODE** - LIM

**COMPLETION DATE** - 02/14/2000   **PUBLICATION DATE** - 02/14/2000

**DESCRIPTION** - The Integrated Management Tracking System (IMTS) is a "Web Enabled" Client/Server Business application that provides for the Identification and Resolution of commitments, situations, events and problems. The IMTS engine is written with Microsoft Active Server Pages (ASP) for IIS4. The system provides for reporting, entering, editing, closing and administration over a Intranet, Extranet or Internet. This Application facilitates: Electronic assignment, acceptance and tracking to completion. Email notifications of assigned action. Establishment of Due Dates. Electronic search and retrieval based on keywords in combination with user specified database parameters (Document Type, Date Ranges, etc.). Coded for Trending and Reporting. User selected reports. Various levels of access for reports and administration. The "Server" side of this application consists of a Microsoft Access database running on a NT Server with Internet Information Server (IIS). As the "Client" side of the application runs on any Web browser, this solution is a cost effective, user friendly application that lends itself to organizations not physically colocated in one location providing information immediately available to everyone at once.

**PACKAGE CONTENTS** - Media Directory; Software Abstract; Media Includes User's Guide, Executable Module;

**SOURCE CODE INCLUDED?** - No

**MEDIA QUANTITY** - 1 CD Rom

**METHOD OF SOLUTION** - A Client/Server database using Microsoft Internet Information Server, Microsoft Access.

**COMPUTER** - IBM PC

**OPERATING SYSTEMS** - Server - Windows NT; Client - any Internet Browser

**PROGRAMMING LANGUAGES** - na

**SOFTWARE LIMITATIONS** - The version 4.0 and greater Internet browsers from Microsoft or Netscape are recommended.

**SOURCE CODE AVAILABLE (Y/N)** - N

**PACKAGE ID** - 001346IBMPC00 IMTS

**UNIQUE FEATURES** - Intranet/Internet based client/server system No software to install on clients except for standard web browser. Email notification on assignment of actions to responsible person. Ease of use, no new software to learn. Easily adaptable for other uses.

**RELATED SOFTWARE** - Database - Microsoft Access recommended; Email Functionality - requires an commercial email component on Server, Online

**HARDWARE REQS** - Server - Any Intel PC capable of running Microsoft Internet Information Server (IIS) using Windows 2000

**ABSTRACT STATUS** - Released AS-IS 9/22/2000
