**LIST OF
NATIONAL COMPETENT AUTHORITIES RESPONSIBLE FOR
APPROVALS AND AUTHORIZATIONS IN RESPECT OF THE
TRANSPORT OF RADIOACTIVE MATERIAL
IAEA, VIENNA, 2001
IAEA-NCAL-32**

**Printed by the IAEA in Austria
January 2001**

FOREWORD

The IAEA's Regulations for the Safe Transport of Radioactive Material has been widely implemented among the IAEA's Member States since it was first published in 1961. Its objective is to protect people, property and the environment from the direct and indirect effects of radiation during the transport of radioactive material.

Any national or international authority designated or otherwise recognized as such for any purpose in connection with the transport Regulations is known as a competent authority. In the Member States, such a body has the responsibility for establishing national legislation to bring the Agency's transport Regulations into effect and for assuring compliance with its requirements. Depending on the national regulatory or institutional framework, the functions of the competent authority may be assigned to one or more bodies.

To assist Member States in implementing the transport Regulations and carrying out responsibility for compliance assurance, the IAEA continues to maintain this updated list of designated national competent authorities. Member States are annually requested to verify the list for correctness and completeness. Additional information may be obtained from:
