

DEPARTMENT OF ENERGY

Public Access Gateway for Energy & Science

A portal to journal articles and accepted manuscripts resulting
from DOE-funded research

A search bar with a light blue border. Inside the bar, the text "Start new search -- Place phrase in 'double quotes'" is displayed in a grey font. To the right of the bar is a button with a magnifying glass icon and the text "Find". Below the bar is a dropdown menu with the text "Advanced" and a downward-pointing arrow.

With **DOE PAGES^{Beta}**, DOE is

- offering readers the best available version of a DOE-affiliated scholarly publication, either the version-of-record journal article or the corresponding peer-reviewed accepted manuscript;
- utilizing its established scientific and technical infrastructure and systems to provide access to DOE-funded authors' accepted manuscripts; and
- partnering with the publisher consortium CHORUS – the Clearinghouse for the Open Research of the United States – and other organizations to complement DOE's public access model.

DOE PAGES^{Beta} contains an initial collection of several thousand journal articles and accepted manuscripts.

DOE PAGES^{Beta}, when fully operational, will offer full-text access to all DOE-affiliated accepted manuscripts or articles after a 12-month administrative interval.

DOE PAGES^{Beta} is scalable to accommodate the large number of DOE-affiliated scholarly scientific publications produced each year, with anticipated annual growth of 20,000-30,000 articles and accepted manuscripts.
