

DEPARTMENT OF THE NAVY
BUREAU OF MEDICINE AND SURGERY
WASHINGTON 25, D. C.

A1114

IN REPLY REFER TO

BUMED-714-eh
NM 12 01 11-11

OCT 1 1957

From: Chief, Bureau of Medicine and Surgery
To: Secretary of the Navy

Subj: Use of Human Volunteers; request for approval of

1. The School of Aviation Medicine, Pensacola, Florida, has presented a research proposal to study the problems of hypoxia and hyperoxia in aviation medicine. These studies are of direct operational importance and are designed to study the effects of prolonged exposures to various concentrations of oxygen under conditions simulating flight situations.
2. There is a minimal but definite risk of complications from such studies. Provisions have been made for adequate safeguards of the subjects and no serious deleterious effects are expected.
3. This research is adequately justified and this Bureau recommends approval of subject request.
