Dr. Roger D. Reid, Head
Medicine and Dentistry Branch
Office of Naval Research
Department of the Navy
Washington, D. C. 20360

Dear Dr. Reid:

I enclose copies of the final report on work done under our ONR Contract No. 2149. Copies of this report have been distributed to the distribution list as requested.

I wish to express to you and the Office of Naval Research and members of the Bureau of Medicine and Surgery our grateful appreciation of the opportunity which this contract has provided the members of our staff to engage effectively and productively in this nutritional research program. We are particularly grateful for the very fine relationship which has existed between the members of our staff and the members of the NAMRU-3 staff and the Command there.

As you know, we shall be continuing our research program through support provided by a grant from the National Institutes of Health, even though this ONR contract has now terminated. In conjunction with this continuation we are submitting a proposal for an equipment loan contract to run con-currently with our National Institutes of Health grant.

We shall continue to welcome any suggestions which your office may wish to make to us relative to our research.

With my kindest personal regards.

Sincerely,

William J. Darby
