Re: Declassified BUMED Records in RG #52 at the Suitland NARA

Dear Capt. George:

Please find enclosed a NARA computer printout briefly describing the 19 entries in the above collection, as well as the handwritten or typewritten finding aids to the relevant entries. Last Friday I reviewed boxes #3-#12 of Entry #1005, but only found a few BUMED R&D budget documents from the 1950s. I also called up box #7 of Entry #1018 (which, among other things, has files on CROSSROADS); however some box from a completely different entry was put on the cart.

In the next month or so, I am going to try to examine more materials from the collection.

Sincerely,

A handwritten signature in cursive script that reads "James E. David".

James E. David
