DATE: March 29, 1991

I am enclosing a memorandum that I wrote summarizing what happened in the whole body radiation extravaganza in which Gene Saenger and I were embroiled from October, 1971 through April, 1972 and perhaps forever after. I would appreciate your comments on the manuscript and whether it is time for this to be submitted or sat upon. Because of your multiple (very responsible) positions within the University, you are a particularly valuable advisor on this paper because of the issues it raises within the Medical Center. I have also enclosed a copy of the article on therapy which resulted from our work. Thanks so much.
