

U S ARMY MEDICAL RESEARCH AND DEVELOPMENT COMMAND

MEDDH-MR

3 November 1958

UCCM / RCC1.958206.005c

MEMORANDUM FOR: COLONEL SULLIVAN

SUBJECT: Application for Research Contract, "Metabolic Changes in Humans Following Total Body Radiation", submitted by Eugene L. Sacnger, MD, College of Medicine at University of Cincinnati

1. I have reviewed the subject proposal in detail and think that it will provide us with much needed information on the little-known metabolic changes in humans following irradiation.
2. I know nothing about the responsible or principal investigators, but presume that they must be of high caliber. The University of Cincinnati College of Medicine and associated hospitals are well recognized and accepted in the medical community.
3. This program also fits in well with work being done at the U S Army Medical Research Laboratory, Fort Knox, Ky.
4. I recommend that the AMS support this contract.
