RCC1.958212.001

Ralph C. Bursiek
Executive Vice President and
Vice President for Business Affairs
University of Cincinnati
Cincinnati, Ohio 45221

Dear Dr. Bursiek:

As you know the bids for the building to house the linear accelerator at the General Hospital were approximately \$30,000 higher than estimated.

It is most urgent that this facility be completed as soon as possible as it is badly needed for the treatment of cancer patients and for our ongoing research in cancer and radiation effects.

Dr. Barrett earlier had written a similar letter to Mr. Arthur W. Schubert and I was unaware of his communication when I spoke with you earlier today. Nevertheless this matter is of such grave importance for our community that its early completion should be assured as soon as possible. In addition I shall work closely with Dr. Barrett to raise the necessary funds to make up the difference.

As always your help and consideration is most gratefully appreciated.

Sincerely,

Eugene L. Saenger, M.D.
Professor of Radiology and
Director, Radioisotope Laboratory
