HEADQUARTERS, AIR UNIVERSITY, Maxwell Air Force Base, Alabama

TO: Commandant, USAF School of Aviation Medicine, Randolph Air Force  
Base, Texas

1. Basic letter and above indorsements thereto were discussed by Col. Carlson, Air University Command Surgeon, with General Benson on 21 March, when General Benson visited this headquarters. Correspondence is returned in accordance with agreement reached during the above discussions.

2. We desire to emphasize the urgent requirement for information concerning the toxicity of Primaquine at altitude as pointed out in paragraphs 3 and 4 of 2d Indorsement above.

3. We concur with the view expressed in 2d Indorsement that such studies can best be conducted at a place having facilities to study individuals at various altitudes. Request your reconsideration of accomplishing these studies at the School of Aviation Medicine where low pressure chambers are available to the investigators.
