Mr. Earl G. Wright, Chief
Health Physics Office
U. S. Army Chemical Corps
Nuclear Defense Laboratory
Army Chemical Center, Maryland

Reference: GMEIRD-ND-44 - Letter dated February 20, 1962

Dear Mr. Wright:

The urine samples submitted with the above referenced letter have been processed for tritium analyses at Los Alamos Scientific Laboratory. Los Alamos reports that they have determined that each sample contained less than 1 uc of tritium per liter of solution. They consider that it is proper to say that there was no tritium detectable in any sample.

We would appreciate it if you will supply a copy of your report of the circumstances related to this sampling when it is available.

Sincerely yours,

Robert W. Kirkman, Director
Region I, Division of Compliance
