

Study Type: Operational/Confirmed  
Classification Code: c

1. Title: Human volunteers in support of work units 7755-05-001 (Normative laboratory data and aerospace crews) and 7755-05-003 (Analytical techniques - Research and development).

2. Where: School of Aerospace Medicine  
When: 1965 - ?

3. Researchers: Marion Stansell, Harry Malvern

4. Organizations: School of Aerospace Medicine, Pathology (SMKPC)

5. Number of Subjects: 6 desired

6. Summary: To develop reliable and efficient techniques in the measurement of clinical parameters in laboratory medicine; informed consent not explicitly mentioned but there is request for human volunteers.

Type of radiation: deuterium oxide (10-20 ml) and tritium (250 microcuries) orally.

7. Records: Memo to Human Use Committee for human volunteers

8. No subject names or consents found
