

FROM: SGHLC (Lt Col. Speicher/7658)

18 January 1972

SUBJECT: Research Proposal ("The Use of 5-Fluorocytosine in Mycotic Infections". Principal Investigator - Charles Ellenbogen, Major, USAF, MC)

TO: John J. McPhaul Jr., Colonel, USAF, MC (SGS)  
Director of Research  
Aerospace Medical Laboratory (Clinical)

1. The clinical laboratory will provide support for the above-named proposal. It is understood that approximately 20 patients will be studied and that studies will include CBC's and routine liver and renal tests.

2. Request that all laboratory request slips be so marked as to identify their belonging to this specific research study.

CARL E. SPEICHER, Lt Colonel, USAF, MC  
Chief, Clinical Pathology Service

Cy to: Dr. Ellenbogen
