

SGS/Co: McPhaul

5 July 1972

Ethan A Natelson, Major, USAF, MC  
SGS

1. I have taken the liberty of closing out your Investigative protocol "Purification and Radioimmunoassay of Blood Clotting Factor IX".
2. In order to close out records you must file a final report. The final report need not be unduly long; it should be concise and clear.
3. Your report should state the purpose of your project, the precise results of your experiments and your conclusions. You should state also your recommendations, if any.
4. If any papers springing from your investigations are published, two (2) reprints of same should be sent to the Director of Research (SGS) for forwarding to the Surgeon General, as per regulations.

JOHN J McPHAUL, Jr, Col, USAF, MC  
Director of Research  
Aerospace Medical Laboratory (Clinical)
