70/11/24	CIDI-15	Enzyme diagnosis of myocardial infarction (MI) after heart surgery.

Abstract: From November 24, 1970 to May 23, 1972 researchers at Wilford Hall Medical Center, Lackland AFB, TX, studied serial cardiac enzymes in patients after open heart surgery. Approximately 75 patients were studied. No radiation exposure was mentioned in the documentation. The results of the study were not significant.
