SUBJECT: ^{Final} ~~Semi-annual~~ Progress Report, SGO #453, "The Radioimmuno-
assay of Serum Androgens: Testosterone, Androstenedione, and
Dehydroepiandrosterone"

TO: SGS

I have received your request for a semi-annual progress report on this project. Dr. Wilbur F. Howard, who was in charge of this project, is no longer in the Air Force. I notice in reviewing a file of letters about this project that, for the last 9 years, the semi-annual progress reports have stated that the project is 33% complete. Dr. Howard did not discuss this project with me and I have no knowledge of the project or its purpose, and I doubt whether the project is still ongoing. I would suggest that this project be terminated.
