 Saint Louis, Missouri 63104

Dear Horst:

The revised draft of your report inclosed with your letter of 27 November is returned herewith. You have been hard at work and have made considerable progress. You have tabulated the data to serve as the basis for treatment of points 4 and 6 in my letter of 28 September to Dr. Cooper. I hope you will bear in mind the other comments made in that letter.

Specific comments on the revision follow:

p30 Control data appear in appendix but appendix does not identify dogs. If this identification were included in the appendix the tabulation of the controls on pages 30, 31 and 32 could be omitted and replaced by a reference to certain dogs in the appendix.

p32, 33 Data for norepinephrine should be broken out into a separate table including the dog number for reference to the appendix and the dose of norepinephrine in each case.

p35 The data should be separated from the text and placed in a table with reference to identification of subject in the appendix.

p36, 37, 38 same as above.

p39 Where does this series of 103 subjects come from? How does it differ from the series of 53 subjects mentioned on p35?
