Dr. C. Robert Valeri
Naval Blood Research Laboratory
615 Albany Street
Boston, Massachusetts 02118

Dear Dr. Valeri:

Enclosed is a copy of the protocol for the proposed study, "Role of Thermal Factors for Metabolic Adaptations to Physical Training." I have incorporated the modifications which we discussed in the revision. This protocol has been submitted to our Institute's Human Use Review Committee. Although I do not anticipate any major problems with the review process, it is quite common for the committee to request that minor changes and modifications be made, particularly in the wording of the Consent Form. Please let me know if Boston University Institutional Review Board for Human Research requires any changes or additional information.

I am pleased that you have agreed to collaborate on this project. Thank you for your help.

Sincerely,

Andrew J. Young, Ph.D.
Research Physiologist
