15 March Pastore, Holifield, and staff visited Kwajalein and heard from medical team Proj 4.1 studying residents moved from Rongelaap and Utirik. Also visited displaced persons quartered there. Summary of findings follows:

1) Utirik group, approximately 150, show no rpt no evidence of any sort of over exposure to radiation. Utirik is 270 nautical miles east of Bikini and exposure began approximately H plus 22 hours. Cumulative exposure estimated at 17 roentgen. Natives removed H plus 78.

2) Rongelaap group, comprising 64 residents, shows definite laboratory evidence of mild radiation injury as demonstrated by modest decrease in white blood cells. No rpt no others signs, nor any definite symptoms of radiation injury have appeared, although slight loss of hair may occur in a few. Report of vomiting by 2 natives during first 48 hours, and of nausea among some others is of uncertain significance; there has been no rpt no reappearance of these symptoms. These residents received approximately 125 roentgen cumulative. Exposure began H plus 5 hours estimated, and residents were removed H plus 50. Distance from detonation 90 nautical miles.

3) Ailinginae group, comprise 18 Rongelaapians visiting uninhabited island, show less laboratory evidence than Rongelaap group. No rpt no other signs and no rpt no symptoms at any time of radiation illness have appeared. Exposure approximately 74 roentgen cumulative. Distance 90 nautical from detonation. Ailinginae slightly south of Rongelaap. Exposure began H plus 6 hours; residents removed H plus 58.

4) Rongerik group, comprising 3 Army 25 Air Force personnel, not rpt not examined by Project 4.1 although clinical findings reported from Eniwetok as negative. Blood picture reported to be similar to Rongelaap group.

5) General information; there has been no rpt no evidence of beta burns to the skin of any native. Reportly, no rpt no beta burns among American personnel either. All exposures above given as estimated total body exposure due to gamma radiation. JTF 7 reports fallout at these locations relatively large particle size therefore no rpt no lung injury expected.

6) Displaced residents appear to Pastore and Holifield as happy and contented. They are well cared for and seem in the highest spirits. To a layman there is absolutely nothing that would suggest any injury. Admiral Clarke deserves highest commendation for handling situation. Medical team says he has been most cooperative.

7) Recording of meeting follows by JTF 7 courier. Used Gray audograph to transcribe.

NOTE: This msg has been relayed to AEC, JTF 7 (REAR).
