Dr. Leon O. Jacobson, Director
 Argonne Cancer Research Hospital
 University of Chicago
 950 E. 59th Street
 Chicago 37, Illinois

Dear Jake:

I want to thank you on behalf of the AEC, and especially the staff of the Division of Biology and Medicine, for the excellent program which was presented by you and the ACRH staff at the November meeting of the Advisory Committee. Your choice of subject matter and the completeness of the individual presentations was excellent. It was very fortunate that Dr. Skaggs' equipment arrived in time to give the group a feel for the arrangement of the beam bender for the linear accelerator. I only hope it can be available for treating cancer patients before the Russians announce the discovery of one of those penicillin-like tablets Dusty Rhoads is always talking about as being just around the corner.

Concerning the hospitality to all of us, I can only say that the luncheon and dinner, in addition to your own hospitality throughout our entire visit, will be remembered with pleasure for a long time.

Again, our sincere thanks for arranging such a fine program.

Sincerely yours,

Charles L. Dunham, M.D.
 Director, Division of
 Biology and Medicine
