17th March 1971

Dr. Wright H. Langham,
University of California,
Los Alamos Scientific Laboratory,
P.O. Box 1663,
Los Alamos,
New Mexico 87544

Dear Wright,

Thank you for your letter of 9 March about hazards and maximum permissible levels for plutonium and associated elements. Your letter is certainly a daunting request but I expect when I turn up the early files on this topic I will be able to fill in some of the early history. I did not enter the health physics field until 1948 but from that date on I was closely associated with the British discussions on these topics (you will recall that my functions at Los Alamos and the immediate post-war years were in a different field).

I hope to be in touch with you within the next month or so to let you know my comments.

Kind regards,
Yours sincerely,

W.G. Marley
