Mr. J. Lorne Gray, President
 Atomic Energy of Canada, Ltd.
 150 Kent Street
 Ottawa, Canada

Dear Mr. Gray:

Speaking for the members of the Advisory Committee for Biology and Medicine to the U. S. Atomic Energy Commission, I wish to express the appreciation shared by all of us for the warm welcome extended by Drs. Butler, Stewart and Marco, as well as by numerous members of their staffs. Our visit to the Chalk River installation was very informative and stimulating. It will long be remembered by us.

Although organizational differences between the bio-medical programs at AECL and the U. S.A.E.C. Division of Biology and Medicine differ materially in some regards, our committee was very favorably impressed with the research program presently under way at Chalk River, and the obvious ability and apparent deep devotion of the staff through which this investigative work is going forward.

If in any way our committee might be of assistance to you or any part of your organization, we would be pleased indeed should you call on us.

Sincerely yours,

Fred J. Hodges, M.D., Chairman
 Advisory Committee for Biology
 and Medicine
