

ADVISORY COMMITTEE FOR BIOLOGY AND MEDICINE
TO THE
UNITED STATES ATOMIC ENERGY COMMISSION
WASHINGTON 25, D.C.

Received copy

710914

November 24, 1964

Mr. J. Lorne Gray, President
Atomic Energy of Canada, Ltd.
150 Kent Street
Ottawa, Canada

Dear Mr. Gray:

Speaking for the members of the Advisory Committee for Biology and Medicine to the U. S. Atomic Energy Commission, I wish to express the appreciation shared by all of us for the warm welcome extended by Drs. Butler, Stewart and Marco, as well as by numerous members of their staffs. Our visit to the Chalk River installation was very informative and stimulating. It will long be remembered by us.

Our committee was favorably impressed with the research program presently under way at Chalk River, and the obvious ability and deep devotion of the staff through whose efforts this investigative work is going forward. We were interested to find that the bio-medical programs at AECL and the USAEC Division of Biology and Medicine differ materially in some regards.

If, in any way, our committee might be of assistance to you or any part of your organization, we would be pleased indeed should you call on us.

Sincerely yours,

Fred J. Hodges, M.D., Chairman
Advisory Committee for Biology
and Medicine
