

PUERTO RICO NUCLEAR CENTER

710967

OPERATED BY

UNIVERSITY OF PUERTO RICO

FOR

U. S. ATOMIC ENERGY COMMISSION

CABLE ADDRESS:

ADDRESS REPLY TO:

NUCLEAR, Puerto Rico

January 13, 1966

TO THE MEMBERS OF THE ACBM AND THE STAFF OF DBM:

It is a great pleasure to welcome you to Puerto Rico and to the Puerto Rico Nuclear Center. Five years ago, the ACBM met here when most of the facilities you will see today were non-existent. The counsel given by the Committee at that time has proved to be invaluable in establishing the objectives and the program structure of the Center. During your stay we will show you some of the most significant program activities but both time and geography will prevent us from presenting the complete picture so that some reliance must be placed upon the written material with which we are providing you.

We have tried to leave a little free time for you to enjoy some of the beauties of Puerto Rico and hope that the sample will induce you to stay longer. Since your meeting will take place at three different locations (four, counting the ocean), the transportation arrangements are somewhat complex but should operate smoothly if the plan outlined elsewhere is followed closely.

Your presence here is not only a source of great pleasure to all of us but comes at a time when your advice is not only needed but can have a profound impact on the future program of the Center.

*John C. Bugher*
