Dear Doctor Gregg:

Your letter of June 29 to Carroll Wilson reporting on the meeting of the Advisory Committee for Biology and Medicine held at the Argonne National Laboratory on June 11 and 12 has been extremely helpful to the Commission.

We are conscious of the fine contributions to the program which are being made by the Advisory Committee, and the recommendations contained in your report are very valuable.

As another chapter to my letter of July 9, 1948 to you, I should like you to know what actions the Commission has under way to implement the recommendations of the Advisory Committee. The attached report of the General Manager will inform you of additional Commission actions not covered in my earlier letter.

Sincerely yours,

UNITED STATES ATOMIC ENERGY COMMISSION

David E. Lilienthal
 Chairman
