DIVISION OF PLANT PATHOLOGY AND BOTANY

Henry Schmitz, President
University of Washington
Seattle 5, Washington

Dear President Schmitz:

I was very happy to hear your voice in your letter regarding the possibility of the AEC Advisory Committee on Biology and Medicine meeting on your campus. Miss Hamilton explained in her letter of March 12 why I did not reply earlier.

There was a special meeting of the Committee in Washington on March 13, and I called your invitation to the attention of the group. They asked me to thank you very much and to say that they were genuinely interested in trying to arrange for such a meeting in connection with a visit to Sanford.

The invitation is on record with the Committee, and I hope that they will find it possible to accept. My term of office expires on June 30 this year; so that I will have to deny myself the pleasure of further committee meetings. I am, however, sending a copy of this letter to Dr. J. C. Bougher, director of the Division of Biology and Medicine, and I am sure he will keep the invitation in mind when the schedule of meetings subsequent to July 1 is arranged.

With very best personal regards,

Sincerely,

E. C. Stakman
