Dr. G. Victor Beard
 Director, Health and Safety Division
 Idaho Operations Office
 P. O. Box 1221
 Idaho Falls, Idaho

Dear Dr. Beard:

The Advisory Committee for Biology and Medicine has asked me to express their thanks and I wish to include my own for the pleasant and profitable visit to the Idaho Operations Office.

The presentation of the programs with the group visits to the Reactor Test Site and to the Health and Safety Division where the various facets of the work underway were discussed, served to impress all of us with the thoughtful planning for our visit. It gave us also a good understanding of the problems you have to contend with and how you are going about it.

The Committee made a special request of me that I express on their behalf to you and to the individual members of your staff, their enthusiastic appreciation for the part they placed in making the meeting of the Advisory Committee so successful and one long to be remembered.

We all came away with the feeling that the program is in good hands and that it will prove fruitful for the advancement of health and safety in the atomic energy reactor programs.

With kindest regards, I am

Sincerely yours,
