[Redacted]

Dear [Redacted]

This is to acknowledge your letter of August 21.

We are indeed building a biomedical capability as part of the Los Alamos Meson Physics Facility. As concerns radiation therapy, work is planned to explore the potential of a new kind of radiation which will be produced here. The facility will not be operational until next July and clinical trials are not scheduled to start until a year after that.

The therapist in charge of clinical trials will be Dr. M. M. Kligerman who is the Director of the new cancer research and treatment center at the U.N.M. Medical School. He is one of the worlds leading authorities on radiation therapy. I am not a physician, only a physicist, so I cannot advise you on any medical matters.

Please accept my best wishes and my sincere hope that your wife's condition will improve.

Sincerely yours,

L. Rosen

Louis Rosen
Director
Los Alamos Meson Physics Facility
