Laboratory

TO: Members of the LAMPF Radiation Therapy Subcommittee
FROM: David E. Groce, Assistant to the Chairman
SUBJECT: MEETING OF THE RADIATION THERAPY SUBCOMMITTEE, LOS
ALAMOS, TUESDAY AND WEDNESDAY, NOVEMBER 9-10, 1971

As you may recall, at our last subcommittee meeting in July, we agreed to hold our next meeting in November. The previous tentative dates, November 5-6, had too many conflicts for a number of subcommittee members. I have contacted most of the members regarding the change to Tuesday, November 9, and the morning of Wednesday, November 10. This will overlap the second day of the Annual Users Meeting and will precede the Biomedical Steering Committee Meeting, starting the afternoon of Wednesday, November 10. These other activities are shown on the enclosed program schedule.

The agenda for this meeting is just being formulated. Max Boone would very much like to hear from each of you regarding agenda items. He can be reached at (602) 882-6385 or at:

Department of Radiology
Arizona Medical Center
University of Arizona
Tucson, Arizona 85724

The enclosed Travel and Lodging Reservation form should be returned to LAMPF as soon as possible in order that reservations on ROSS Airlines (Albuquerque to Los Alamos) and reservations at the Los Alamos Inn can be secured. This form should be returned not later than October 22. As you may be aware, most airline schedules (including ROSS) are changed considerably on October 31. When our Public Relations Office receives your reservation form, they will automatically place you on an appropriate ROSS flight. It is planned that special ROSS flights and buses will be arranged for Sunday, November 7.

The Los Alamos Scientific Laboratory will reimburse you for your subsistence and round-trip air fare if such assistance is needed. A form letter, addressed to Dr. Louis Rosen, for the purpose of securing this assistance is enclosed.

A short reply form, addressed to Dr. Max Boone, indicating your plans concerning attending the meetings in Los Alamos is also enclosed. If there are any questions or if I can assist you in any way, please do not hesitate to call me at (714) 459-2601. We certainly hope that you will be able to attend this meeting, so that your influence may be felt in shaping the pre-therapeutic trails which are essential for later consideration of radiotherapy using negative pi mesons.
