DOCTOR JOHN H. LAWRENCE

Dear Doctor Lawrence:

I recently talked with Wally in reference to the part that the A.E.C. will play in the New Metabolic Unit and he told me that there are two things in his estimation that should be done; they are as follows:

1. That some preliminary discussion should be instituted as soon as possible with Cowell Hospital (probably their Business Administrator) as regards setting up a new contract to cover the costs of operating our Unit through the services of Cowell itself. Wally of course is well aware that we have a small contract set up which has covered our operation with Cowell the last two or three years, but he is of the opinion that a new one should be investigated because it will be a much broader and more extensive coverage. Furthermore, Wally is interested in getting this in for an estimation as soon as possible so that it may become a regular part of the operational cost for the project and so that it may become a part of the regular budget and the discussions regarding the budget, as soon as possible. In other words, Wally wants enough information to be able to present the A.E.C. with the operational budget of Cowell Hospital as soon as possible.

2. The list of equipment which was used for the estimate of roughly \$50,000 support on the addition of Cowell Hospital (see attached) was made up originally sometime ago, actually in Ken Priestly's time and at his request. Wally feels that this list should be gone over and changes made where indicated, because of the lapse of time he feels that certain changes on this list are probably in order.

Would you kindly advise me as to what your desires on this matter may be.

Sincerely,

R. A. San Souci
