MEMORANDUM FOR THE GENERAL MANAGER

The fission yields for Sr⁹⁰, from U²³⁵, U²³³, and Pu²³⁹ with fission neutrons, and from U²³⁸ with 14 Mev neutrons (and neutrons of energies down to the fission threshold) should be determined experimentally as soon as possible for use in the Sunshine Program. Dr. English could coordinate this effort.

W. F. Libby

cc: Mr. Strauss
Mr. Murray
Dr. von Neumann
Mr. Vance
Dr. Johnson
Dr. Dunham

Tammaro: Please see me
about this.
