I have just been informed that a sedimentation rate test done Saturday, July 13, 1946 on [REDACTED] blood showed the following results:

20 min. - 5 mm
 40 min. - 14 mm
 60 min. - 35 mm
 80 min. - 53 mm

Because of this elevation I have asked [REDACTED] to resume bed rest for one week. He will return Monday, July 22, 1946 to see you and to get another sedimentation rate determination.
