Martin L. Minthorn, Jr., Ph.D.
 Division of Biology and Medicine
 United States Atomic Energy Commission
 Washington, D.C. 20545

Dear Dr. Minthorn:

Here is the application for the 18th renewal of our AEC contract. As you will note, there are no unexpended funds in this year's budget to carry over. The reason for this is that all but one of Dr. Okada's students have passed their qualifying exams and they are engaged in research full time. The cost of labeled compounds, media and horse serum, etc., was fantastic.

As I told you, our research program for the next contract year will be transitional with Dr. Okada's departure and Dr. Lange's arrival. We will miss Dr. Okada but have great hopes for Dr. Lange. You will note from the enclosed curriculum vitae that Dr. Lange has had excellent training and has performed well. He is very highly recommended by Dr. Lajtha who says he is a promising young scientist with an original mind and a strong feeling for applied mathematics in biology. You will also note from the curriculum vitae that he is quite full of himself but I suppose that this is natural for someone with a B.S. from MIT in physics and a D.Phil. from Oxford. Actually he spent a week with us in June and is quite a pleasant young man. Once he lives in the States, I am sure he will lose some of his stuffiness.

If you have any suggestions about budget, etc., please let me know.

With kindest regards, I am

Sincerely yours,

hau

Louis H. Hempelmann, M.D.
